

Md Meher Ullah

Full-Stack Javascript Developer

+60 183 821 593(WA), meherullah97@gmail.com, KL, Malaysia.

LinkedIn: [linkedin.com/in/raajkhan](https://www.linkedin.com/in/raajkhan)

Career Summary

For the last few years, I've been working across different technologies and environments.. If it's something I've already worked with, I can contribute; otherwise, I'm quick to learn and adapt. My experience includes leading backend optimization, mentoring junior developers, and building scalable APIs. I care deeply about writing clean, maintainable code and enjoy working with cloud infrastructure to deliver solutions that put users first. I've worked in remote, onsite, and hybrid setups. Originally from Bangladesh, I relocated to Malaysia in 2023 and am now looking for my next opportunity.

Skills

Languages: JavaScript, TypeScript, and PHP. **Frameworks:** NodeJS, NestJS, ReactJS, NextJS
Databases: PostgreSQL, MySQL **Cloud:** AWS (ECS, ECR, CloudWatch, RDS, Elastic Cache, S3, ELB) **API:** REST API, GraphQL, Open API(Swagger) **Tools:** Docker, Git, New Relic, DataDog
